Funding Opportunities for COVID-19 research

The Office of the Vice President for Research and Innovation has a research [UO COVID-19 FAQ page](#) with excellent resources regarding research, including specialized funding opportunities related to COVID-19.

Dear Colleague Letter: Guidance for Computer and Information Science and Engineering (CISE) Proposers to the Faculty Early-Career Development (CAREER) and CISE Research Initiation Initiative (CRII) Programs

With this [Dear Colleague Letter](#), the National Science Foundation's (NSF) Directorate for Computer and Information Science and Engineering (CISE) seeks to provide members of the CISE research community with clarifying guidance about the directorate's implementation of the NSF Faculty Early-Career Development (CAREER) and CISE Research Initiation Initiative (CRII) programs. This announcement explains the difference between the two programs and encourages prospective applicants to the CAREER program to submit their first proposals within two years of starting their tenure-track appointments. Interested faculty should direct questions to CISE CAREER and CRII Working Group listed in the letter.

Dear Colleague Letter: Encouraging Mid-scale Research Infrastructure in Computer and Information Science and Engineering

With this [Dear Colleague Letter](#), the National Science Foundation's Directorate for Computer and Information Science and Engineering (CISE) encourages the research community to contemplate and pursue critical needs for unique mid-scale research infrastructure (RI) that can serve one or more research communities at a national level, and have the potential to significantly advance NSF-supported research disciplines. CISE encourages the community to prepare for potential future opportunities like the NSF Mid-scale RI programs. CISE emphasizes interest in innovative and integrative mid-scale RI projects in areas not already well-supported by existing programs and that are science-driven, holistic and integrative, and service, performance and sustainability oriented. Interested faculty should direct questions to CISE program officers listed in the letter.

Curated Pivot Searches

[Pivot](#) is a funding opportunities database of available external funding opportunities from federal, non-federal and international sponsors across all disciplines and is accessible to UO researchers using your Shibboleth login.

Visit our [Getting Started with Pivot page](#) to learn more about using the powerful online funding database tool. We will show you how to identify funding opportunities, save alerts for on-going searches, and identify collaborators.

NOTE: These curated reports can only be accessed while you are on the UO network or using a UO VPN. If you receive an authorization error, please clear your browser's cache and cookies, and then try again. Please see the "Connecting to UO VPN" for more information about using the UO VPN.
